PERSONAL SUMMARY

Master's student in Electrical and Computer Engineering with a BSc in Computer Science (Honours), passionate about networks, smart systems, and hands-on technology. Skilled in IT service management, cloud computing, VLSI design, and cybersecurity, with practical experience in lab environments and technical projects. Motivated to apply a hybrid software-hardware background to solve complex challenges across engineering, networking, and cloud roles.

EDUCATION

University of New Brunswick *Fredericton, NB*
Master of Electrical and Computer Engineering (*GPA 3.8)* *January 2025 – Present*
Relevant Coursework: Network Security, Software Evolution & Maintenance, Cloud Management, VLSI Systems Design, Smart Grid Analytics, Digital Forensics, Embedded Systems.
Activities: Enactus UNB (General Member) – Collaborated on social entrepreneurship projects to empower youth through financial literacy.

Middlesex University *London, UK*
Bachelor of Computer Science *September 2019 – May 2022*
First Class Honours in Computer Networks with a final year dissertation on mitigating DDoS attacks using Access Control Lists (ACLs).

Aptech Education Centre College *Doha, Qatar*
Advanced Diploma in Software Engineering *January 2018 – January 2019*

TECHNICAL EXPERIENCE

University of New Brunswick *Fredericton, NB*
Teacher Assistant – ECE*3221: Computer Organisation *Jan 2026 – Present*

- Managed hands-on labs and simulation environments, configuring hardware and software to ensure smooth student experiments in CPU architecture and digital logic.
- Provided technical guidance and mentorship, helping students debug assembly code, troubleshoot processor design tasks, and responding to questions via email or office hours.
- Evaluated lab reports and assignments in D2L, giving timely, constructive feedback on technical accuracy and system-level understanding.
- Invigilated quizzes and exams, upholding academic integrity while supporting a fair and organized testing environment.

Loreal Groupe *London,UK*
Technical Support Specialist *August 2023 – April 2024*

- Provided frontline IT support by managing and resolving incidents and service requests through ServiceNow, Microsoft Teams, phone, and direct interaction, handling over 15 daily technical issues.
- Administered user account security processes, including password resets, BitLocker recovery, and antivirus software configuration, ensuring compliance with corporate security policies.
- Liaised with third-party vendors such as HP and Daisy to coordinate hardware repairs and SIM card management, minimizing downtime and enhancing operational efficiency.
- Managed and maintained SharePoint sites, including permissions, content organization, and user support, ensuring smooth collaboration and document accessibility across teams.
- Leadership: Selected to train and onboard two new staff members, providing hands-on guidance in ServiceNow ticket handling and security protocols.

Global Tech Consultant *London, UK*
Technical Support Specialist *December 2021 – June 2022*

- Performed critical upgrades of end-user devices and managed ticket escalations, ensuring minimal disruption to business operations.
- Conducted thorough troubleshooting post-upgrade to verify system stability and performance, reducing recurrence of technical issues.
- Successfully upgraded over 10 laptops from Windows 10 to Windows 11 within a single day, accelerating user adoption of the new OS and improving workplace productivity.

Mohammed Internet Cafe *Blida, Algeria*
Helpdesk Support *June 2017 – September 2017*

- Installed antivirus programs, conducted system cleanups, and performed hardware troubleshooting to enhance computer performance and security for café customers.
- Identified and resolved major PC performance bottlenecks, contributing to improved user experiences and customer satisfaction.

PROJECTS

Probabilistic Solar Irradiance Forecasting for Head Hall, UNB Fredericton:
Developed a Machine Learning model (QRF) using NASA data to optimize day-ahead energy planning, reducing forecast error by ~50%.
FPGA-Based 16-bit Microcomputer Design:
Designed and verified a 16-bit microcomputer in Verilog with a custom instruction set and FSM controller.
Penetration Testing and Vulnerability Analysis:
Exploited system vulnerabilities using Metasploit and analyzed network traffic via Wireshark to design mitigation strategies.
Smart Product Recommendation (AWS):
Architected a cloud-based recommendation system using AWS S3 for secure storage and product data analysis.
Preserving Evidence Integrity – Testing and Validation of Tools :
Validated digital forensic evidence and analyzed malware artifacts using Xeek, Wireshark, and Volatility 3
***Final Year Dissertation**:*
Mitigated simulated DDoS attacks on a network topology designed in Cisco Packet Tracer using Access Control Lists (ACLs).
***E-commerce Website**:*
Developed a responsive e-commerce prototype using JavaScript to implement dynamic front-end features.

RELEVANT EXPERIENCE

Winners *Fredericton, NB*
Retail Salesperson *June 2025 – Present*
- Engage with a diverse customer base to deliver tailored shopping experiences, effectively driving brand loyalty and repeat business.
- Conduct comprehensive inventory audits and manage merchandise replenishment, ensuring product displays remain visually appealing and well-stocked.
- Collaborate closely with store associates and management to maintain a clean, safe, and inviting retail environment, improving overall customer satisfaction.

University of New Brunswick *Fredericton, NB*
Campus Patrol *June 2025 – Present*
- Conduct regular patrols to identify safety risks, promptly report incidents, and support campus security operations.
- Enforce campus policies while assisting students and staff, fostering a secure and supportive environment for the university community.

TK Maxx *London, UK*
Retail Associate *October 2023– September 2024*
- Led and motivated the sales floor team to deliver exceptional customer service, improving overall store efficiency and customer satisfaction.
- Coordinated merchandise organization and restocking efforts, ensuring optimal product presentation and inventory management.
- Managed customer feedback by addressing complaints promptly and escalating issues to management, fostering a positive shopping environment.
- Trained new hires and served as an Operations Support Volunteer to assist with the store launch and layout setup.

SKILLS & Certifications

- **Platforms & Systems:** Windows, macOS, Linux, Microsoft 365, Active Directory.
- **Tools & Software:** D2L (Brightspace), SharePoint, BitLocker, OneDrive, AV Configuration.
- **Cloud & Virtualization:** AWS (S3, EC2, IAM, VPC), VMware.
- **Networking:** Cisco 1941 routers, TCP/IP, Routing & Switching (CCNA/CCNP-level), ACLs, BGP, DMVPN.
- **Forensics & Security:** Wireshark, Volatility, NetworkMiner, Autopsy, tcpdump, Data Privacy & Compliance.
- **Professional Skills:** Technical Documentation Review, Technical Mentorship, Laboratory Safety Protocols, Hardware Troubleshooting, Information Confidentiality.
- **IT Service Management:** ServiceNow (Incidents, Requests, SLAs), Ticket Escalation & Triage, Remote Desktop Support.
- **Certificate:** AWS Cloud Practitioner.
